Hongkong, October 29, 1868, HOLLOWAY'S PILLS & OINTMENT

HOLLOWAY'S PILLS. I HIS Medicine is universally admitted to be the most efficacious remedy known to the world. No preparation is ac suitable to the climates of India and Chips as this fine and invigorating medicine. is particularly adapted to the constitution of European ladies, as it is never failing in its effects in all diseases peculiar to females, while those who are attenuated by the debilitating effects of the above climates wil find in this wonderful remedy a kind of talisman whereby they may insure a restora-

tion to robust health. HOLLOWAY'S CINTMENT.

The science of Medicine has never before produced any remedy that can be compared to this wonderful Ointment, as it cure after all other means have failed, al wounds, sores, ulcers, and also the most inveterate skin diseases peculiar to the climales of India and China. It is the true friend of the Soldier and Civilian, as certain old sores can be femoved by it tha cannot be conquered by any other treat-

HONGKONG, SATURDAY, DEG. 4, 1869. A RUMOUR.

RUMOUR is in circulation which pos sesses peculiar interest for the Colonists f Hongkong, whether as regarding their political views, their ideas of local expenditure, or their private interests. It to the effect that despatches have been received from the Home Government disapproving the various expenditures which have been made from the "Special Fund " for local purposes; directing that these be borne by the ordinary revenue of the Colony; that the Colonial yacht and other "superfluities" are to be given up; and, worse than all, giving instructions for the transmission England of the total amount accruing from the gambling licenses. We are not in a position to affirm or deny the positive truth of this rumour, being in receipt of no special information. we may express our entire belief that

THE CITY HALL LIBRARY

AND MUSEUM. A CIRCULAR is in course of distribution respecting the Library and Museum the City Hall, to which we are glad o direct public attention. It was originally intended to issue this circular at her commencement of October, but the ex. pected arrival of the Duke of Edinburghe and the manifest inconvenience which would have ensued by the reception of cases, books, etc., while preparations were being made for his reception, led to its being postponed. The circular is now issued in the belief that a season of greater leisure on the part of the com munity will ensure greater attention to its contents.

A very brief statement is given of the present state of the library, which as yet comprises only the Morrison and Asiatio Libraries. For a long time it has been proposed to turn over the Victoria Library to the City Hall, but nothing has as yet been done. But it may confidently be hoped, we should imagine, that every one possessing books of little value to himself and unlikely to meet with any sale, will be willing to aid in the formation of a public library of reference. All volumes sent will be received, though the Committee of course reserve the right of selecting such as should be put upon the shelves—a right of selection however which will not, we imagine have to be often exercised, as works on almost any subject will be welcome. Uf course the principal aim is to create a library especially bearing upon the Far East in general and China in particular. Possessors of sets of Consular and Cus. Reports, Parliamentary Correspondence, and Blue Books generally may afford material aid by presenting them

to the library. As to the Museum, it is at present a collection of cases and little else; but we may anticipate the gradual formation of a collection, if our scientific men will take the lead. A well-known leading sinologue has promised a geological collection, and in this and metallurgy our Shanghae and Coast friends may be expected to afford material help. Models or specimens of the utensils, machines, or means of transport, samples of the natural or manufactured products of the empire etc., are greatly to be desired. We condense the concluding paragraphs of the circular as the shortest exposition of the Committee's views :---

*** Any objects of general interest will find place in the Museum, such as models of ships, machinery, &c. It is proposed to livide the collection into two parts, viz. the Gift Collection and the Loan Collection. Objects presented under the former head will become the absolute property of the institution. Persons desirous, on the other hand, of merely lending objects, will be granted a formal receipt, the presentation of which by any person will entitle him to receive back the article in Hongkong at three days' notice. The return of any such receipt "cancelled" will be held as finally making over the object to the institution. The Committee appeal with confidence to the many scientific men in the Far East to aid them in their undertaking. The Curator's efforts must fail unless heartily supported by all who desire to see in the Hongkong Museum a useful adjunct to the study of the peoples and customs of Eastern Asia. Application has been made to the Colonial and Chinese Governments, to the officers commanding the British and other Naval Squadrons, and to the owners of Steam-ship Lines, to place such facilities for transport at the disposal of contributors as may be practicable, and due notice of the arrangements entered into will be made

We may mention that the Naval Commander-in-Chief and the Agent of the P. M. S. S. Co. have promised to place every facility at the disposal of contributors in the conveyance of packages, etc. —a fact of which we hope Coast readers will take notice.

WE have received from the pastor of the Berlin Foundling Institution in this Colony the Annual Report for 1869, and note with much pleasure that the prospects of this benevolent undertaking are an improved condition. To take charge of, feed, clothe and educate in a sensible way suited to their condition a number of children who would otherwise die a lingering and painful death from the inhumanity of their natural guardians or the fortune of native warfare, is at least an act which commands the respect and good wishes of the most worldly; and the part of the good Samaritan is most effectually performed by the

distitution under notice. There is nothing very sensational in the little pamphlet before us. It is a simple record of quiet and unostentatious work. Speaking of the children, it says:-

It is natural that among so many children the most diverse conditions of life are represented; and though most of them belong to the poorer classes, but one of the Our views on the Special Fund are suf- eldest girls here (as we afterwards ascer-

THE PROPOSED COLONIAL CON-

-London and China Express, 22nd Oct.

In our issue of Aug. 27 we announced that Mr Youle, Mr Blaine and Mr Sewell; three well-known and influential colonists, had addressed a public circular to a number of our colonies, calling attention to some points in the system of government" under which they are at present connected with the mother country, and inviting the colonial Governments to send delegates to London early next year to discuss the subject in detail. The chief point suggested for debate was the practicability of a confederation of the various outlying parts of

the empire into one homogeneous whole, Answers have been received promising the attendance of a large body of delegates. at the proposed conference; an influential. committee has been formed in town to make the necessary arrangements; and Lord. Bury has, we understand, agreed to become, chairman of the committee on the conditions (to which Mr Youle and his associates readily assented) that the Royal Colonial Society should take the management of the Congress if it elected to do so, and that whatever action might be taken should be as far as possible, in concert with Her Majesty's Government.—Ibid.

COLLIS BROWNE'S CHLORODY NE -Extract from the General Board of Health, London as to its effectoy in Cholera "so strongly are we convinced of the immense value of this remedy that we cannot too forcibly urge the necessity of adopting it in all cases."

"Various importers and Manufacturers have ttempted to attain a reputation for their prepared Cocoas, but we doubt whether any thorough success had been achieved until Mesers Taylor Brothers discovered the extraordinary qualities of "Maravilla" Cocoa. Adapting their perfect system of preparation to this finest of all species of the Theobrome, they have produced an article which supersides every other Cocon in the market. Entire solubility, delicate aroma, and a rare concentration of the pures elements of nutrition, distinguish the Maraville Cocoa above all others. from the "Strasts Times," July 27, 1865 Some time ago we had occasion to remark upon the progress that Literature as represented by the Press had made spides that making in the East, and our attention has again been called to the subject by the H cerpt of a Hongkong publication with deserves some notice and which we have much pleasure in introducing to the knowledge of our readers. We allude to Notes and Queries on China and Japan, published monthly by Mr Saint, the proprietor of the China Mail newspaper. This publication is well printed on good paper, and in his and shape is very like its well-known hamesake or prototype at home, and is equally a mine containing very curious and juseful information regarding the language, litera ture, history, manners, and customs of the Chinese and in a less degree of the Japanese It says a good deal for the extent and stability of the footing of Europeans or China, that such a publication as this should be established and conducted with apparently successful vigour. has is the

(From the "Friend of India," June 4, 1868 We acknowledge with thanks the receipt of the numbers for the current wear) of "Notes and Queries," a most deserving Anglo-Chinese monthly, edited by Min. B. Dennys, whose "Treaty Ports of China and Japan " are so well known. From the names attached to the "Notes" we can see that the contributors include some of the beat Chinese scholars in the East. Itshinterest is not confined to China, and it will be of valuable assistance to all scholars; who have directed their attention towards the subject of Buddhism and its literature, and generally to all who are interested in oriental antiquities. It deserves to be better known in India

This really useful volume ["Treaty Ports of China and Japan "] is intended as a guide for travellers and residents in China and Japan, and as a book of reference for mercantile men generally. It contains ar account, historical and political, of all the open ports of these countries together with Peking, Yedo, Hongkong, and Macao, I has been carefully compiled and edited by Mr N. B. Dennys; and the elaborate; maps and plans, with which the work abounds considerably enhance its value. * (*) We have thus given in outline seme of

the more prominent portions of the chapter devoted to Canton, as a specimen of the whole volume. Other chapters treating of Macao, Formosa, Ningpo, Shanghae, and the remainder of the treaty ports, we can only enumerate. The pages describing Peking, the capital, are so interesting and contain so much that is new to Europear readers respecting its history, public Buildings, and general characteristics, that we would fain transfer them to our collings. A complete and intelligible plan of the Imperial City and neighbourhood, gives us an accurate notion of the relative position of its divisions, streets, and places; In the introductory chapter to the notices of the Treaty Ports of Japan will be found

a succinct history of that Empire, together with remarks on its government, geography, and limits, which will be found particularly interesting as throwing a considerable High on a part of the world so long entirely, land WM. F. MAYERS, P.R.G.S., H. M. C. S., still comparatively, unknown to Europeans. The descriptions of Nagasaki, Yedo, Yokohania, and the other Treaty Ports of Japan, are as elaborate and entertaining as those of the Chinese ports. A coplous index and a useful appendix containing many hints and much appropriate advice to travellers and others, is also included in the volume. They entire work affords a vast amount of information, pleasantly written, and we doubt not will be perused with
